Experience

REGISTERED RADIOLOGIC TECHNOLOGIST | BRISTOL REGIONAL MEDICAL CENTER | JUN 2016-OCT 2021

- Developing creative ways to obtain diagnostic-quality images from difficult exams
- Helping patients with basic needs
- Calculating ideal ranges of peak kilovolts and milliamps per second for each exam to avoid needless overexposure to ionizing radiation for any patient
- Instructing and empowering rad tech students
- Served as a member of the Radiology Employee Satisfaction Committee

RADIOGRAPHY CLINICAL STUDENT | LAUGHLIN MEMORIAL HOSPITAL | AUG. 2015-DEC 2015

- Assisted registered technologists with exams
- Provided quality patient care
- Performed radiographic exams in fluoroscopy, surgery, inpatient, outpatient, emergency room, and CT departments
- Performed radiographic exams in trauma situations

RADIOGRAPHY CLINICAL STUDENT | JOHNSON CITY MEDICAL CENTER, | SEPT 2014-APR 2016

- Same as above

LAYAWAY ASSOCIATE | KMART| APR 2014-OCT 2014

- Performed day-to-day store operations such as cleaning, stocking, and assisting customers
- Drafted and maintained multiple customer contracts for layaway purchases
- Provided intense physical labor in packing up heavy items and carrying heavy boxes for customers

Volunteering/Hobbies**BOONE LAKE CLEANUP**

- Every April, there is a Saturday dedicated to the cleanup of waste around the local Boone Lake. If I was not needed at the hospital, I loved to participate in this day to assist in preserving the beauty of this local treasure.

MUSIC

- I have always had a passion for music and am a self-taught flautist, clarinetist, and oboist. I worked hard from a young age to achieve these goals in an area with very few music educational resources.

LANGUAGE

- The study of foreign languages has interested me from a young age. I currently have an interest in studying Japanese and am somewhat proficient in Spanish from continued study after taking a few Spanish courses in high school. During my time at Bristol Regional Medical Center, I often served as the go-to technologist to interact with Spanish-speaking patients who were unable to effectively communicate in English.
